

## 170D – LF – SA

### Wax lavatory thermostatic mixing valve assembly

#### 1. 170D-LF Wax lavatory thermostatic mixing valve assembly

- A. Mixing Valve shall comply with National Low Lead Laws @< .25% Lead
- B. Mixing valve shall be 1070 certified
- C. 170D-LF shall:
  - 1. Have 3/8" inlet and 3/8" outlet connections
  - 2. Have integral check stops to prevent cross flow with screens to prevent debris from passing through.
  - 3. 0.25-4GPM (2.84-15l/min)
  - 4. Have all components be from corrosion resistant materials
  - 5. Have adjustable temperature control from 95°F -120°F
  - 6. Include Locking temperature regulator to prevent accidental movement
  - 7. Include integral cold-water bypass
- D. Finish
  - 1. Rough finish
  - 2. Chrome plated options.
- E. SA – Sink Adapter
  - 1. Connector that mounts the mixing valve to a 4" faucet
  - 2. Locking nuts with washer included
